DETAILED ACTION

1. This office action is response to Applicant's RCE filed on 07/05/2006.
2. Claims 1-3, 5-10, and 26-29 remain pending.

Claim Objections

3. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3, 5, 6, 8-10, and 26-29 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Huang et al U.S. Pat. 6,151,582 in view of Greene's Production and Inventory Control Handbook, 3 Ed; Dobler's Purchasing and Supply Management, Text & Cases, 6 Ed., and White's How Computers Work. Huang discloses a planning application which is a supply chain planning engine 160, a manager application, status data as demand data 148, and resolving at least a portion of the capacity extreme

Art Unit: 3621

(Huang optimizes production) Huang does not directly disclose precisely as claimed an attempt at least a portion of the capacity. Greene in Chapter 10 directly teaches "attempts" at "resolving" capacity issues.

Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Huang as taught by Greene to include attempts at least a portion of the capacity extreme through interactions. Such a modification would have helped improved decision to accomplish the production plans as the most affordable costs. White is cited simply to show the features of a computer that are inherent in Huang. Dobler is also cited to show those features of Huang that are inherent.

RESPONSE TO ARGUMENTS

6. Applicant's arguments filed on 07/05/2006 have been fully considered but they are not persuasive.

REMARKS

7. With regard to Applicant's representative arguments, Applicant's representative argues that the prior art of record fail to disclose the recited feature:

a. A computer-implemented system for managing an excess or under capacity at a first entity in a supply chain. However, the Examiner respectfully disagrees with this assertion since Huang discloses a planning application which is a supply chain planning engine 160. Please note that the supply chain engine 160 is interpreted as a means of managing a supply chain.

Art Unit: 3621

b. Applicant also maintains that Huang and Greene cannot be combined, the Examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

The rationale to modify or combine the prior art does not have to be expressly stated in the prior art; the rationale may be expressly or impliedly contained in the prior art or it may be reasoned from knowledge generally available to one of ordinary skill in the art, established scientific principles, or legal precedent established by prior case law. *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988); *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). See also *In re Eli Lilli & Co.*, 902 F.2d 943, 14 USPQ2d 1741 (Fed. Cir. 1990) (discussion of reliance on legal precedent); *In re Nilssen*, 851 F.2d 1401, 7 USPQ2d 1500 (Fed. Cir. 1988) (references do not have to explicitly suggest combining teachings); *Ex parte Clapp*, 227 USPQ 972 (Bd. Pat. App. & Inter.); and *Es parte Levengood*, 28 USPQ2d 1300 (Bd. Pat. App. & Inter. 1993) (reliance on logic and sound scientific reasoning).

Also in reference to *Ex parte Levengood*, 28 USPQ2d, 1301, the court stated that "Obviousness is a legal conclusion, the determination of which is a question of patent law.

Motivation for combining the teachings of the various references need not to explicitly found in the reference themselves, *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981). Indeed, the Examiner may provide an explanation based on logic and sound

scientific reasoning that will support a holding of obviousness. In re Soli, 317 F.2d 941 137 USPQ 797 (CCPA 1963)."
